MESSAGE from the PRESIDENT

Welcome to the 18th Annual Hand Review Course and Annual Scientific Meeting of the Singapore Society for Hand Surgery. The theme for this year's Review Course is "What's New in Hand Surgery". In keeping with this theme, we have put together a symposium to cover exciting developments in the field. There will also be a comprehensive programme covering the scope of Hand, Wrist and Microvascular Surgery. The course will benefit surgical trainees, especially those interested in Hand Surgery, Orthopaedic Surgery and Plastic Surgery. This course is also relevant to Occupational Therapists and Nurses whose work involves the care of Hand, Wrist and Microvascular patients. We are privileged to have Professor Duncan Angus McGrouther from the United Kingdom as part of our teaching faculty. He is a world renowned and vastly experienced surgeon with exciting research in Tissue Engineering. We invite you to share in the knowledge and experience of Professor McGrouther and the rest of the faculty. We also invite you to share your experience through discussion and participation in our Annual Scientific Meeting.

A/Prof Aymeric Lim
