Sentinel Lymph Node Biopsy for Breast Cancer

A hands-on workshop for surgeons

17-18 October 2008
KK Women's and Children's Hospital, Singapore

KK Women's and
 Children's Hospital
 SingHealth

" Training in sentinel lymph node biopsy has 3 components: didactic instruction, preferably supplemented with live animal models, operative proctoring by an experienced colleague; and monitoring of outcomes ..."

*Moffat F, Guest Editorial,
J Surg Onc 2005*

Sentinel lymph node biopsy is a technique that is becoming the standard of care of surgical staging of early breast cancer. This comprehensive interactive course, one of its kind in the region, introduces participants to state of the art technology in sentinel lymph node biopsy. It also allows participants to attempt live sentinel node biopsy in an animal model in a laboratory setting.

At the end of the 2 day workshop, participants will be able to:

1. Understand the technical aspects of lymphatic mapping and SLN biopsy
2. Select appropriate patients for SLN biopsy
3. Perform SLN biopsy using radioactive tracer and blue dye

Course director:

A/Prof Hong Ga Sze
Head & Senior Consultant

Dr Tan Yah Yuen
*Consultant
Breast Unit, KK Women's and Children's Hospital*

Course Venue:

KK Women's and Children's Hospital
